

# *Mitigate* Risk While Moving Toward a Successful Tomorrow

## Our Experts

At John Lynch & Associates, our consultants work with executives to realign and redesign critical areas of their organization to manage the present challenges but also to forge ahead for healthier and prosperous tomorrow.

## Risk Mitigation Action Chart

Now is the time for leadership teams to focus on how to make pivoted changes more permanent where applicable and determine how to roll back others while continuing to keep the organization healthy moving forward. Also, taking necessary steps to reinforce operations, improve services for patients, and assist employees who are working from home to be most productive, your organization will continue to positively evolve as we move into post-pandemic life. Utilize the chart below to guide you through new ways of offering services while evolving customer service.

Redesign  
**THE FUTURE**

During a time when most hospitals and ambulatory practices are working through the shock of the crisis, an influx of patients, or a complete restructure of services, organizations should be reinforcing leadership roles and focusing on morale.

As executives are considering how to recreate value in their present state, it is also critical to be managing the big picture while heading toward a new future. The future of your organization is directly related to the consequences of your present initiatives; therefore, [developing and implementing a sound strategy](#) is critically important.

## Your **PLANNING** & **OPERATIONS**

## Your **WORKFORCE** **RESTRUCTURE**

## Your **PATIENT** **CARE**

Designate a full-time [project manager](#) to lead planning, preparation, and execution of strategies. Create back up plans in case supplies run short and focus on potential exposures that might spread within the organization. Create a task force to assist in areas that are most highly impacted.

We anticipate and help mitigate the most common pain points organizations face and how [project management techniques](#) can relieve strain. An effective project manager eliminates barriers – such as lack of accountability, missing dependencies, and lack of clarity on goals – in order to create the space for each team member to thrive.

The time is right to get creative. Continue to evaluate ways employees working from home can assist in virtual care; re-evaluate the effectiveness of your [telehealth solution](#) and the [optimization of your EHR](#); retrain or enhance skills of those who can assist but haven't worked in an ICU setting.

We align and develop your resources to leverage skill and experience while improving [organizational structures and processes](#). We excel at creating transformational value and competitive edge for our clients.

John Lynch & Associates estimates that over 75% of healthcare leaders are currently investing in advanced analytic tools; however, most of these organizations are struggling with implementation and productive use of these products. Now is the time to train your healthcare workers and utilize your system's analytics and reporting to highlight and focus on patient populations with underlying conditions resulting in higher risk.
